

SUCROSE24

Oral Sucrose Solution

PRODUCT DESCRIPTION

SUCROSE24 is a sterile oral solution composed of water and sucrose (24%), designed for controlled administration in neonatal intensive care units.

The product is ready-to-use and intended for use by healthcare professionals in hospital environments.

INTENDED USE

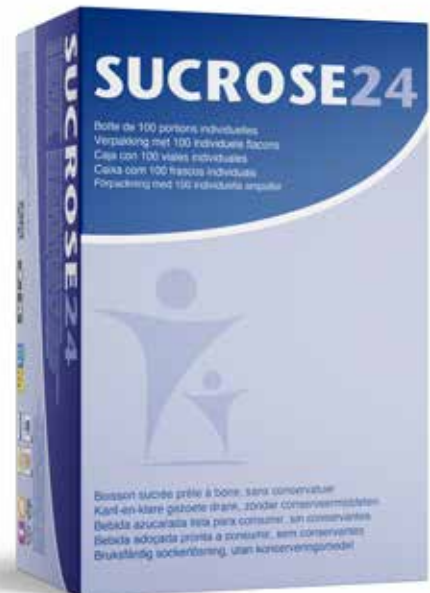

SUCROSE24 is developed for specific nutritional use in newborns, including preterm infants, under the supervision of healthcare professionals.

It is suitable for administration as part of routine neonatal care practices,

USE IN CLINICAL PRACTICE

Sucrose solutions are widely used in neonatal units as part of established clinical practices in many hospitals worldwide. **SUCROSE24** is designed to support these practices by providing:

- a standardized sucrose concentration
- a ready-to-use sterile format
- controlled and convenient administration
